

آشنایی با پایگاه استنادی PubMed

فاطمه حسینی زاده

کارشناسی ارشد کتابداری در شاخه ی پزشکی

دانشجوی دکترای علم اطلاعات و دانش شناسی

کارشناس پژوهشی و علم سنجی دانشکده علوم توانبخشی

سرفصل ها

- ❑ مقدمه
- ❑ مروری کلی بر محتوای پابمد
- ❑ جستجو در پابمد
- ❑ نمایش و مرتب سازی و پیمایش در موارد بازیابی شده
- ❑ استناد، ذخیره سازی و اشتراک گذاری
- ❑ جستجوی پیشرفته
- ❑ سایر خدمات
- ❑ پیوست ها

مقدمه

پابمد یک منبع رایگان است که از جستجو و بازیابی متون زیست‌پزشکی و علوم زیستی با هدف بهبود سلامت - چه در سطح جهانی و چه در سطح شخصی - پشتیبانی می‌کند.

پایگاه داده پابمد شامل بیش از ۳۸ میلیون استناد و چکیده از متون زیست‌پزشکی است. این پایگاه شامل مقالات تمام متن مجلات نیست؛ با این حال، پیوندهایی به متن کامل اغلب در صورت وجود از منابع دیگر، مانند وبسایت ناشر یا پابمد سنترال (PMC)، را در اختیار کاربران خود قرار می‌دهد.

پابمد که از سال ۱۹۹۶ به صورت آنلاین در دسترس عموم قرار گرفته است، توسط مرکز ملی اطلاعات بیوتکنولوژی (NCBI)، در کتابخانه ملی پزشکی ایالات متحده (NLM)، واقع در مؤسسات ملی بهداشت (NIH)، توسعه داده شده و نگهداری می‌شود.

از نظر محتوایی

استنادات موجود در PubMed عمدتاً از حوزه‌های زیست‌پزشکی و سلامت و رشته‌های مرتبط مانند علوم زیستی، علوم رفتاری، علوم شیمی و مهندسی زیستی ناشی می‌شوند.

PubMed جستجو در چندین منبع ادبی NLM را تسهیل می‌کند:

Medline که بزرگترین بخش پابمد است و عمدتاً شامل استندهایی از مجلات نمایه شده در مدلاین است؛ این مقالات با استفاده از MeSH (سرعنوان‌های موضوعی پزشکی) نمایه می‌شوند.

PubMed Central دومین بخش بزرگ پابمد را تشکیل می‌دهد. این بخش یک آرشیو جامع از متن کامل مقالات مجلاتی می‌باشد که توسط NLM منتشر می‌شوند.

Bookshelf آخرین بخش پابمد می‌باشد که یک آرشیو متن کامل از کتاب‌ها، گزارش‌ها، پایگاه‌های داده و سایر اسناد مربوط به علوم زیست‌پزشکی، سلامت و علوم زیستی می‌باشد.

Search in PubMed

How do I search PubMed?

1. Identify the key concepts for your search.
2. Enter the terms (or key concepts) in the search box.
3. Press the Enter key or click Search.

For many searches, it is not necessary to use special tags or syntax. PubMed uses multiple tools to help you find relevant results:

- ❑ Best Match sort order uses a state-of-the-art machine learning algorithm to place the most relevant citations at the top of your results.
- ❑ An autocomplete feature displays suggestions as you type your search terms. This feature is based on PubMed query log analysis described in "[Finding Query Suggestions for PubMed](#)."
- ❑ A spell-checking feature suggests alternative spellings for search terms that may include misspellings.
- ❑ A citation sensor displays suggested results for searches that include terms characteristic of citation searching, e.g., author names, journal titles, publication dates, and article titles.

Proximity searching

I retrieved too many citations. How can I focus my search?

To limit the number of search results:

- ❑ Replace general search terms with more specific ones (e.g., low back pain instead of back pain).
- ❑ Include additional terms in your query.
- ❑ Use the sidebar filters to restrict results by publication date, full text availability, article type, and more.

J Nurs Manag. 2022 Jul;30(5):1168-1187. doi: 10.1111/jonm.13626. Epub 2022 Apr 22.

Use the sidebar filters to restrict results by publication date, full text availability, article type, and more.

17

The screenshot shows a web browser window with a search bar containing the query: `pubmed-ncbi-nlm-nih-gov.libbook.xyz/?term=health+"knowledge+management"+in+haspital`. The browser's address bar and tabs are visible at the top. The main content area displays search results for the query. On the left side, a sidebar contains filter options, which are highlighted by a red rectangular box. The sidebar filters are organized into four sections: PUBLICATION DATE, TEXT AVAILABILITY, ARTICLE ATTRIBUTE, and ARTICLE TYPE. The PUBLICATION DATE section includes radio buttons for 1 year, 5 years, 10 years, and Custom Range. The TEXT AVAILABILITY section includes checkboxes for Abstract, Free full text, and Full text. The ARTICLE ATTRIBUTE section includes a checkbox for Associated data. The ARTICLE TYPE section includes checkboxes for Books and Documents, Clinical Trial, Meta-Analysis, and Randomized Controlled Trial. The search results on the right show three entries. The first entry is a journal article from J Nurs Manag. (2022) with a PMID of 35403311. The second entry is a policy system article from Health Res Policy Syst. (2022) with a PMID of 35710382. The third entry is a guideline article from Respiration. (2022) with a PMID of 34933311. Each entry includes a 'Download PDF' button and a 'Free PMC article' link. The bottom of the screen shows the Windows taskbar with various application icons and the system clock indicating 9:56 PM on 7/31/2025.

Non-specific low back pain.

1 Maher C, Underwood M, Buchbinder R. Lancet. 2017 Feb 18;389(10070):736-747. doi: 10.1016/S0140-6736(16)30970-9. Epub 2016 Oct 11. PMID: 27745712 Review.

Non-specific low back pain affects people of all ages and is a leading contributor to disease burden worldwide. ...Because non-specific low back pain does not have a known pathoanatomical cause, treatment focuses on reducing pain and its consequ...

Acute and chronic low back pain

Nathan Patrick¹, Eric Emanski¹, Mark A Knaub²

Affiliations + expand

PMID: 24994051 DOI: 10.1016/j.mcna.2014.03.005

Abstract

Low back pain is an extremely common presenting complaint that occurs in upward of 80% of persons. Treatment of an acute episode of back pain includes relative rest, activity modification, nonsteroidal anti-inflammatories, and physical therapy. Patient education is also imperative, as these patients are at risk for further future episodes of back pain. Chronic back pain (>6 months' duration) develops in a small percentage of patients. Clinicians' ability to diagnose the exact pathologic source of these symptoms is severely limited, making a cure unlikely. Treatment of these patients should be supportive, the goal being to improve pain and function.

Keywords: Acute low back pain; Chronic low back pain; Patient education; Treatment protocols.
